RE: Atlas Minerals  
Far West Mine Suspension  
ACT/037/019  
San Juan County, Utah

Dear Rick:

During our meeting on May 25, 1983 you mentioned that there had been no progress made in accordance with your proposed plan for trash cleanup (solid waste disposal) at the Far West minesite which had been submitted May 24, 1982. Because renewed suspension of the operations is dependant on active cleanup the Division would like to expedite matters. Apparently there has been some disagreement with either the State or County Health Departments regarding one item or another in the proposal. Because documentation of the situation has not been provided I do not know where to begin to resolve the matter. If any agency has any objections to the plans please forward a copy of this letter to them and have them contact me.

Existing alternatives must be available and I would like to see this matter resolved without obdurate misunderstandings perpetuated. If possible you may perhaps wish to call me so that we may speak together in a three way conversation with the other agency. If there are no objections to the proposal the Division approves of the amendment as submitted and work on the project should begin immediately.

Sincerely,

A large, stylized handwritten signature in black ink, likely belonging to Thomas N. Tetting, is written over the typed name and title.

THOMAS N. TETTING  
ENGINEERING GEOLOGIST
